

O lovely, lovely, lovely Spring!  
 O robed in sunbeams - bridegroom  
 King!

Breathe on my heart and bid me sing,  
 Or rather praise and pray;

For emblems are these sunny hours  
 These golden meads, & streams & flowers  
 Of everlasting May.

Crane's Bill

and what is so rare as a  
day in June?  
Then, if ever, come perfect days;  
Then Heaven tries the earth if  
it be in tune,  
and over it softly her warm  
ears lay.

quadrimaculata

P93Cmc175

This morning we went up Long Knoll with our Thoruley, on our way up we saw many mosses, sedges & grasses, whose names we learnt. We saw the Moss *Formosum* both male & female. This little moss can be distinguished by its red stem. (This is by no means an absolute direction.) Under an oak tree we found a gall on a piece of oak. This was made by an gall fly. These little animals always make spangle galls. We next came across a caterpillar - of the Winter moth. it has five pairs of legs instead of six. Thus it has to loop itself up when it walks along. & is called a loopier. For this. Some aphidies - horrid looking eggs almost every  $\frac{1}{4}$  hour and end of the season, they resist the winter. Then we noticed, on a leaf little black things - they lay if these are laid near the winter. We saw, & caught a Daddy! he has a little pin each. These pins represent a 2nd pin. On the ground we saw a also a true black blue beetle were the wings. This beetle

P94Cmc175

*Tipula* ~~*Balanus*~~ *Vernalis* - called so because side of his thorax to balance him of wings. Woodlouse - Slater Crustacean which had wing cases in which has a complete metamorphosis

Wood

Then we came to the Sedges  
has triangular stems, with sep  
the top & pistillate under.  
is a jointed <sup>rush</sup> ~~edge~~, & if open  
then "hard grass", with flowers

We next came across an ants'  
nest belonged to the Red Ants  
that only the Hive Bee has

along a rock we found  
both staminate & pistillate  
we saw on the ground a  
leaved it was called the Coffee  
some Harvesters.

Then near Lily Varn we found  
Rush - "Junco squarrosus"  
- a Caddis fly.

P96cmcl75

Rhagium

Fly.

This afternoon we went with  
up near the Hook. Here we  
among them, another Soldier  
a Hover fly, *Trypula gigantea*  
In the evening Mr. Thoruley  
Nature Struggles for life-  
important knowledge -  
was how well insects and  
living objects to protect  
For example, moths, & butter-  
flies often only one of them is a  
and habits so marvellously  
them from their copy.  
& many insects, in colour,  
the "warning colours," example  
colours of a wasp, & chickens  
often, as it walks like a  
Insects mimic leaves & sticks

Mr. Thoruley again, this time  
found many kinds of insects  
Beetle & many Saw flies.

Telephorus  
obscurus

Daddy -

gave us a lecture on how  
he gave us some very  
One subject he touched upon  
animals imitated dead and  
themselves from their enemies -  
flies imitate each other for  
model & others copy it in colour  
that only experts can distinguish  
wasps are imitated by flies  
these colours are known as  
the wasp Beetle has the very  
would think one was a wasp  
wasp.

as we know in the case of

the "leaf insects" & "stick insects" -  
Caterpillars are the same colour  
as the plants on which they feed,

we also learnt how to  
distinguish the larvae of different  
flies and insects - this is done  
by the number of their legs  
apple flies have 3 pairs of legs in their  
larval stages.

The flies have none - and the  
Saw-flies have 10 pairs of legs or  
sometimes more than that.

June 25<sup>th</sup>

Greater  
Hairy  
Willow Herb

Today I went up to Thistley woods. for a nature walk. We came across an elm tree and noticed how beautifully the buds were covered. They cannot even be seen when looking on the right side of the leaf.

As we walked along the road we found some pretty moss. & noticed how the male flower being over, the moss went on growing up through which seemed very wonderful & strange. This does not happen in the case of the female flower.

When we came to a meadow we look at the field sorrel.

p102cm175

Witch  
Crow foot

Silver  
weed

and found that there were both sexes - the one in flower which never has any fruit - & the other in fruit with seeds.

Then we tried to find how many different kinds of flowers the hay-field had - we named many - Upright & Bulbous Buttercups - Eyebright - Pigweed - Speedwell - Cat's Ear - daisy - Marguerite Hawkweed - Lady's fingers - meadow and Dutch clover - Cowheat - meadow Crane's bill - mouse eared & Common Chickweed - Sheep & Common Sorrel and a number of grasses - yellow Rattle Bedstraw

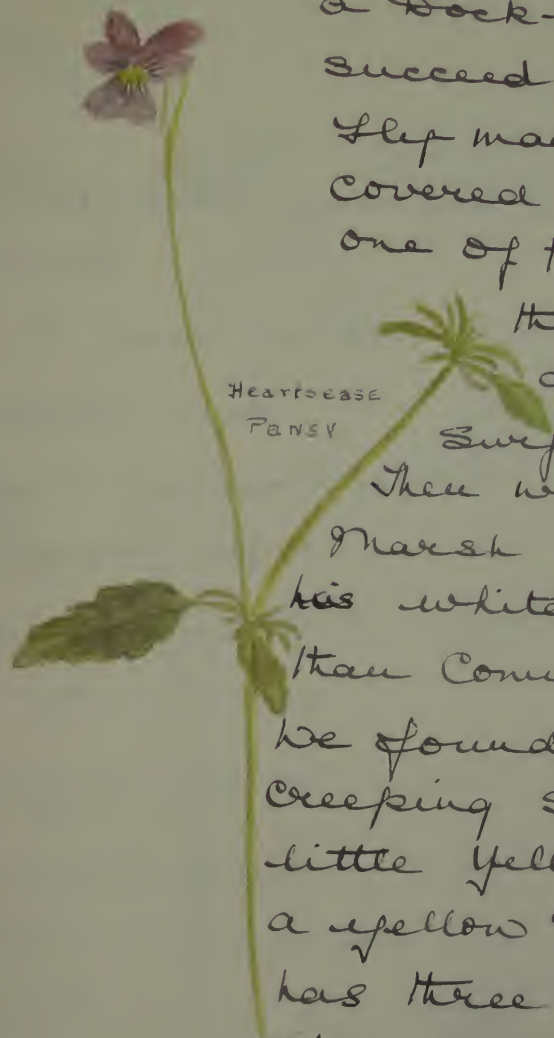

Scrophularia  
aquatica

We looked at the Dock plant - to try and find a Dock-beetle - we did not succeed, but we saw a Fly maggot which had covered itself up in one of the leaves - <sup>under</sup> between the epidermis. This appeared two Surfaces.

Then we found some Marsh Bedstraw, which has white petals & higher than Common Bedstraw. We found for the first time creeping St. John's wort, this little yellow flower resembles a yellow Pimpernel - but it has three visible groups of stamens, while the Pimpernel has five.

Overhead we heard a Curlew crying for some minutes.

Heartsease  
Pansy

ROSE

In the warm hedge grew lush  
 eglantine  
 Green cow-bind, and the moon-  
 light coloured May  
 and cherry-blossoms, & white  
 cups whose wine

Was the bright dew yet drained  
 not by the day;  
 And wild roses, & ivy serpentine  
 With its dark buds & leaves,  
 wandering astray  
 Shelley.

# The Night Sky in June

God is in the starry sky,  
 In the lovely violet's eye,  
 In the wood where birdsongs ring  
 In my heart when "Sleep"! I sing.  
 Just remember - God is there.

The moving Moon went up the sky  
 and nowhere did abide:  
 Softly she was going up,  
 and a star or two beside

Her beams bemocked the sultry  
 main,  
 like April hoar-frost spread;  
 But where the ship's huge  
 shadow lay,  
 The charmed water burnt always  
 a still and awful red.

Yellow Flag  
or Iris

nearer to the river's  
trumbling edge

There grow broad flag-  
flowers, purple & white,  
with white,

And stony river-beds among  
the sedge.

And floating water lilies, broad  
& bright,

which like the oars that overhung  
the hedge

with moonlight beams of their own  
watery light. Shelley.

Dans les bras tordus  
 des ronciers fleuris  
 la rive craquée, au bout  
 d'un fil gris,  
 Voltige et circule;  
 Mon esprit, lassé par de  
 longs combats,  
 S'attendait à suivre en ses  
 vains états,  
 L'être minuscule.

White.  
 BTIONY

comfrey

Vincetoxicum  
officinale

The Scarlet pimpernel peeps here & there  
amid the corn the crimson poppies  
Still on the brooks gleam water-lilies rare  
And purple-loosestrife & the flowering  
rush;

The blue campanula, and chicory wild

And yellow *Madia* variegata  
the plain

And with a thankful heart and  
Sense beguiled  
We look upon the fields of ripening  
grain.

# S Adams.

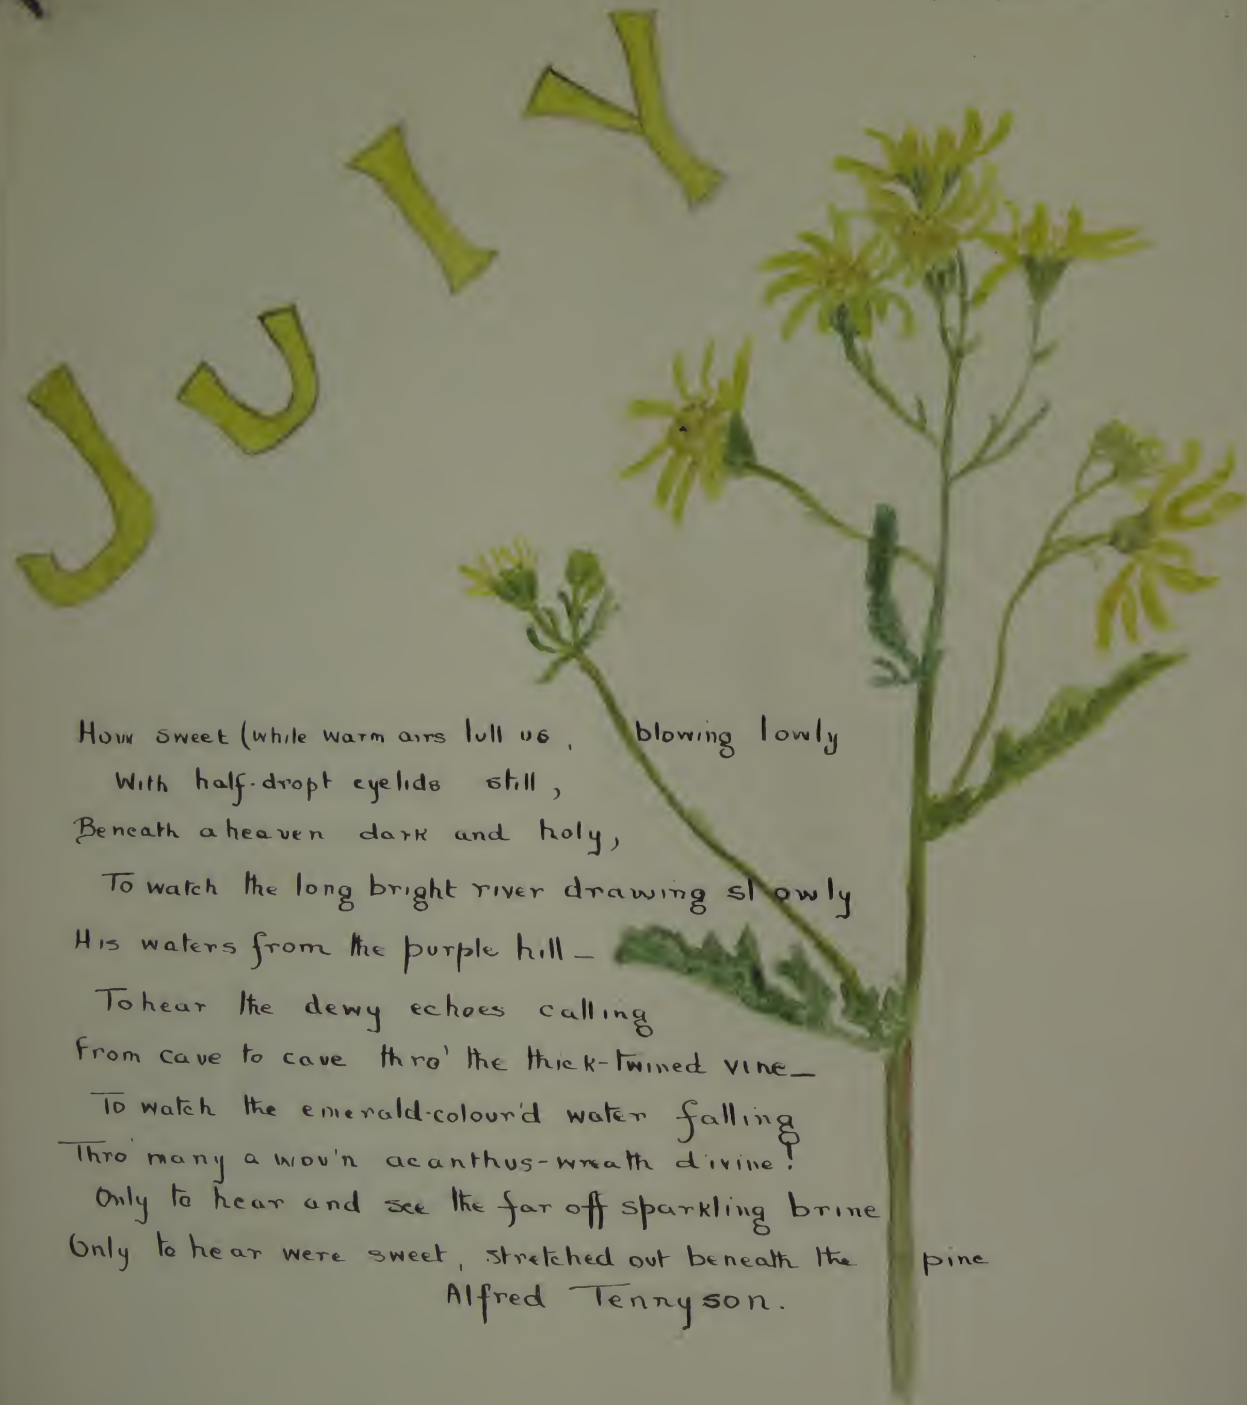

Yellow  
Stonecrop

p114cmcl75

How sweet (while warm airs lull us, blowing lowly  
 With half-dropt eyelids still,  
 Beneath a heaven dark and holy,  
 To watch the long bright river drawing slowly  
 His waters from the purple hill -  
 To hear the dewy echoes calling  
 From cave to cave thro' the thick-twined vine -  
 To watch the emerald-colour'd water falling  
 Thro' many a wov'n acanthus-wreath divine!  
 Only to hear and see the far off sparkling brine  
 Only to hear were sweet, stretched out beneath the pine  
 Alfred Tennyson.

mant

July 27<sup>th</sup>

We have been in France now a week and it has been a great surprise to find so many flowers. They are not the same as one can find in Umbria.

The first day we found nearly ten new flowers - we were struck with the variety kinds of vetches here - some we cannot find the names of - amongst others we have the yellow vetch - Alsike clover - a flea-bane, like a small sunflower - we have found two kinds of Malilot, the yellow and the white.

We were very pleased to find Black Nightshade - Lady's & Hedge Bedstraw. All the hedges are prettily covered with white Bonyony and Traveller's Toy which make them look lovely - the berries of the former are beginning to turn red.

There are quite a few blackberries ripe here, which seems to be very early.

Wild  
Chamomile

I admired and took my part  
With crowds of happy things the  
while:

With open velvet butterflies

That spread and spread their  
peacock eyes,  
As if they cared no more to rise

From off their beds of chamomile  
Jean Ingelow

Blue flowers mewed themselves  
 in the brook,  
 and called to the waves from  
 their sheltered nook:  
 "forget-me-not!"  
 The wavelets laughed "We must  
 haste to the sea,  
 and out of sight out of mind  
 will be,  
 "forget-me-not!"

The softly-warbled song  
 Comes from the pleasant woods and coloured wings  
 Glance quick in the bright sun, that moves along  
 The forest openings

**BIRD** And these are Nature's voices, these the  
 That bid the poet join their band <sup>choir</sup> & sing;  
 Thrice-happy choristers, no poet's lyre  
 Should mar the rapture that your voices bring  
 Sing on, oh sing, and let our sole desire  
 Be at your feet, to still lie listening  
 Samuel Waddington

**LIST**

The summer's throbbing chant is done  
 And mute the choral antiphon;

The birds have left the shivering pines  
 To flit among the trellised vines,  
 Or fan the air with scented plumes  
 Amid the love-sick orange blooms  
 And thou art here alone - alone -

Sing, little bird! the rest have flown  
 Oliver Wendell Holmes
